BASIL INSTRUCTIONS

1 Fill jar with $\frac{1}{2}$ inch of sand, pebbles or marbles for drainage.

2 Fill $\frac{3}{4}$ of the jar with loose soil.

3 Moisten the soil with enough water to make the soil mildly damp.

4 Sow a few seeds an inch or two (2.5 to 5 centimeters) apart.

5 Cover the seeds with $\frac{1}{4}$ inch of soil, but do not pack the soil down.

6 Moisten the soil with a spray bottle & germination should occur within a week.

7 Cover the seeds with $\frac{1}{4}$ inch of soil, but do not pack the soil down.

8 Set the container near a sunny window. A south-facing window typically works best. Basil thrives in full sun but needs at least six hours of sunlight a day to grow properly.

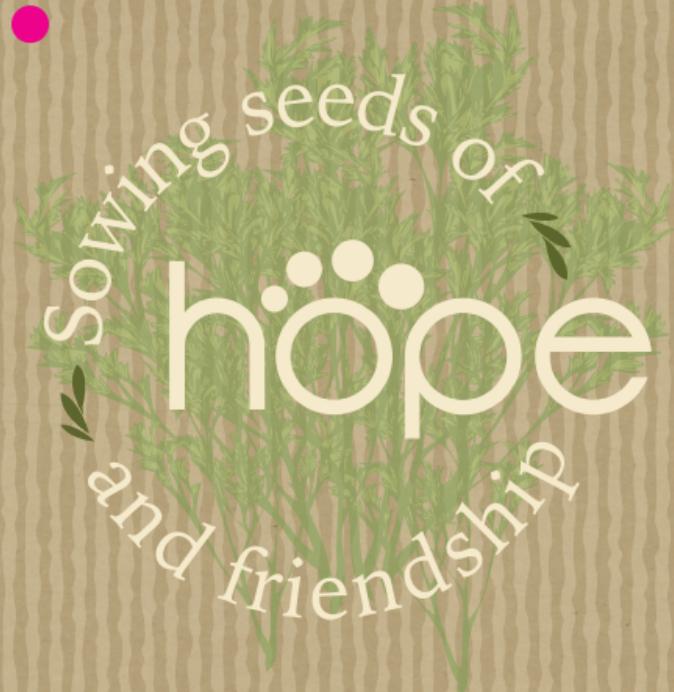

We look forward
to growing a relationship
between our organization
and yours.

Sowing seeds of
hope
and friendship

PARSLEY INSTRUCTIONS

1 Soak seeds in warm water overnight before planting.

2 Fill jar with $\frac{1}{2}$ inch of sand, pebbles or marbles for drainage.

4 Moisten the soil with enough water to make the soil mildly damp.

3 Fill $\frac{3}{4}$ of the jar with loose soil.

5 Sprinkle a few seeds on the surface of the soil.

6 Cover the seeds with $\frac{1}{4}$ inch of soil, but do not pack the soil down.

7 Moisten the soil with a spray bottle. Germination may take several weeks.

8

Set the container near a sunny window. Parsley needs at least five hours of sunlight a day to grow properly.

9

Water regularly to keep the soil moist to the touch but not soggy.

We look forward
to growing a relationship
between our organization
and yours.

CILANTRO INSTRUCTIONS

1 Fill jar with $\frac{1}{2}$ inch of sand, pebbles or marbles for drainage.

2 Fill $\frac{3}{4}$ of the jar with loose soil.

3 Moisten the soil with enough water to make the soil mildly damp.

4 Sprinkle the seeds lightly over the soil to disperse evenly.

5 Cover the seeds with $\frac{1}{4}$ inch of soil, but do not pack the soil down.

6 Moisten the soil with a spray bottle & the seeds should germinate within 7 to 10 days.

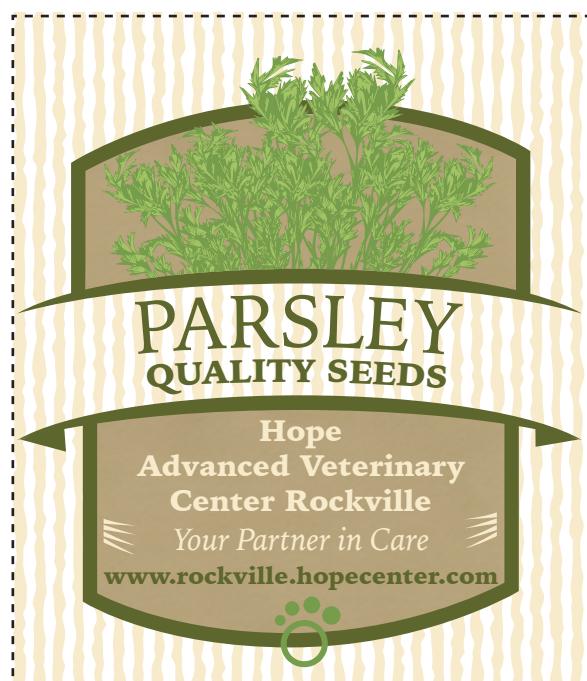

7 Place the jar in a sunny spot. Cilantro needs full sun to grow, so placing it in a sunny window-sill or conservatory is best.

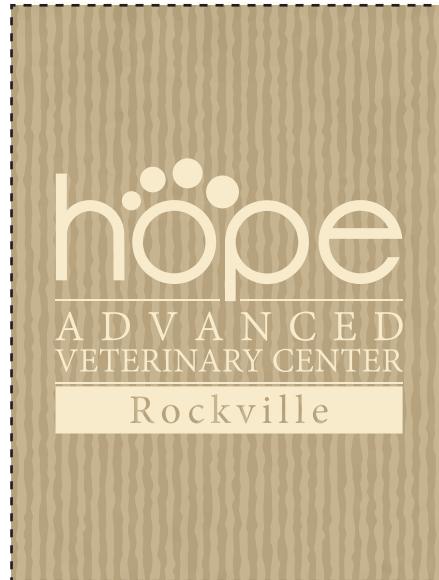

8 Keep the soil moist using a spray bottle.
