

On a Saturday morning, Lucy fell on walk and suffered a spinal cord injury that rendered her unable to move, sit up, or walk.

She was immediately brought in to Bush Veterinary Neurology Service.

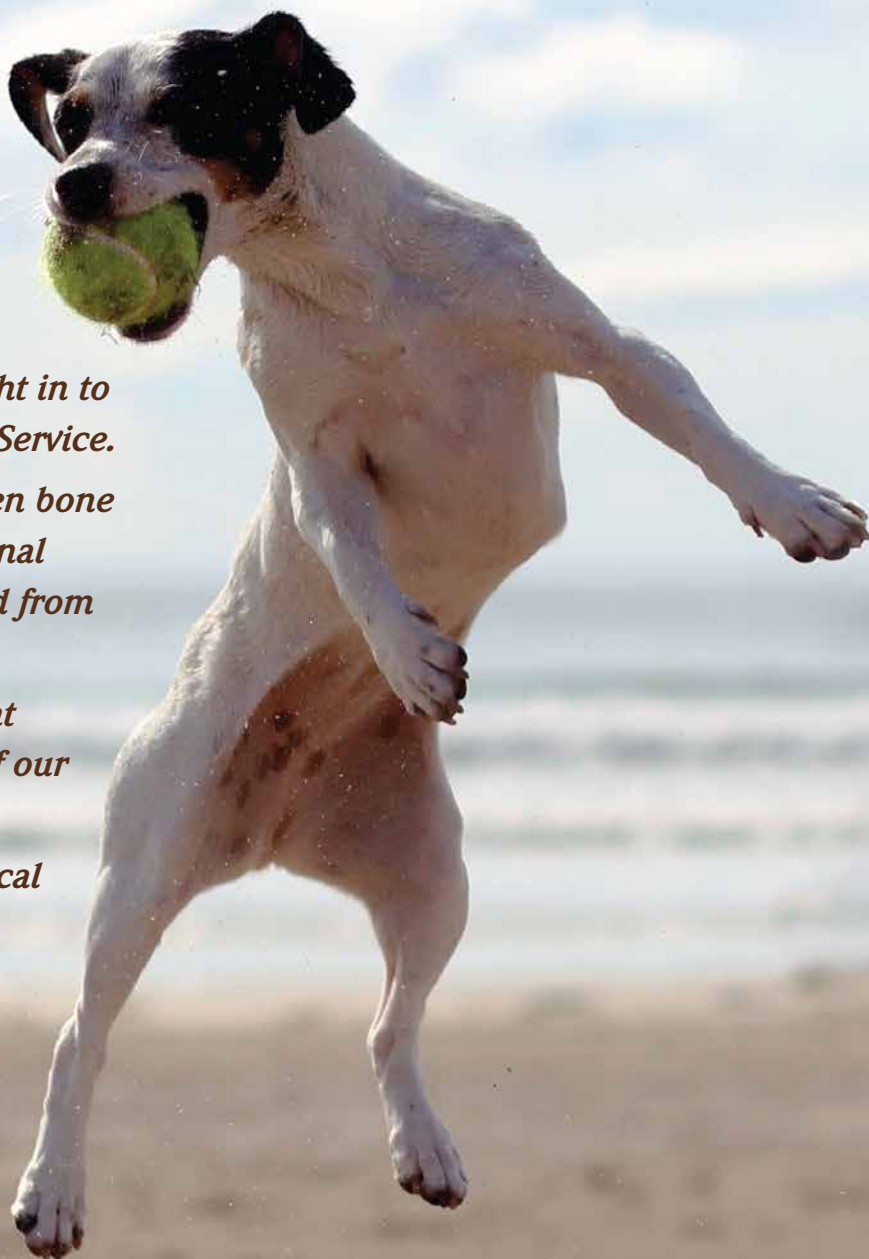

Lucy's MRI revealed a broken bone displaced into the spinal canal compressing the spinal cord from the right side.

Lucy underwent surgery that same day and walked out of our office 3 days later.

After a few months of physical therapy and recovery, she's back to her old self and loving life.

Our on-site MRI provides the ability to do same-day imaging and surgery.

Even on a Saturday.
